OBJECTIVE

Paul Davis is currently a Computer Science student at UT Knoxville. He has interests in Software Engineering, AI Development/Research, and Biomedical Informatics. He is eager to expand his skillset in all areas of scientific research and computer science.

EXPERIENCE

AI RESEARCH INTERN

Vanderbilt University Medical Center. Nashville, TN | Mar 2023 - Aug 2023

Research in AI, specifically ChatGPT's API. Developed a website using Streamlit servers in Python and determined that ChatGPT's API is capable of translating JSON formatted data into data accepted by a playground database, and sending said data to the database. My project is proof that ChatGPT is capable of altering data that it can then send to an external source.

EDUCATION

HIGH SCHOOL

Martin Luther King Jr. Magnet High School. Nashville, TN | Aug 2018 - May 2023

COMPUTER SCIENCE

University of Tennessee Knoxville. Knoxville, TN | Aug 2023 - Present

CERTIFICATIONS & COURSES

Calculus I & II (MATH141-142), Data Structures and Algorithms (COSC202), Physics for Engineers I & II (EF151-152)
